

GIVE TO GO GREEN

You give.

We match.

Double your impact.

As you may know, not only is the church heating system proving unreliable at present, but, more importantly, we cannot afford to run the heating system as we did in the past. The **much-increased** cost of energy means that to do so would have increased our annual heating costs from around **£3,000 p.a.** to well **over £10,000**. We need to find a more sustainable way to make the church comfortable.

The really good news is that we have been selected as one of the very few Church of England churches throughout the UK to be offered a match funding 'Give to go Green' grant to enable us to install a much more sustainable form of heating which will also reduce our annual heating costs considerably. We are currently looking at options to achieve this and we are part of a CoE working group to ensure that we establish the most appropriate solution for our church.

The basis of the grant is that the Church of England will double any money which we raise, **between 1 February and 16 March**, up to a maximum grant of £5,000. So, as a church we are aiming to raise a total of £5,000 ourselves.

In order to secure the grant, we are asking whether you would give prayerful consideration as to whether you would be able to make such a donation for this purpose during this six-week period. If so, the following link will take you straight to our matched donations website:
